Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3653

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-11 and 13-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number 1,110,174 by Zander (hereinafter Zander). The coin tube disclosed by Zander incorporates tube g, tube a, lower tube a section and opening e that read on the Applicant's first body portion, second body portion, male connector and female connector, respectively.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zander as applied to claims 2 and 10 above, and further in view of Patent Number 475,563 by Howe (hereinafter Howe). The coin tube of Zander fails to incorporate a connector comprising an L-shaped slot. However, this type of tube connection is well known in the art. Howe teaches a multi-component coin tube that is connected via L-shaped recesses 12. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the L-shaped slot connector of Howe into the coin tube of Zander to provide an effective means of connecting separate coin tube components.

Conclusion

The following related art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number US 6,709,325 B2 by Korsen because of its cylindrical portion 13,
Patent Number 5,573,109 by Isacson because of its locking portions 76,
Patent Number 4,479,502 by Iversen because of its cylindrical tubes 12,
Patent Number 3,346,109 by Duran because of its notches 54,
Patent Number 2,977,736 by Condis because of its elongated indentation 14,
Patent Number 1,757,008 by Doble because of its bottom plate 14, and
Patent Number 463,256 by Side because of its sleeve 9.
